

## BABKA COSTUME INSTRUCTIONS

THIS BABKA COSTUME IS VERY COMPLEX AND EXPENSIVE, AND CONTAINS PARTS THAT CAN BE BROKEN IF DROPPED ON THE FLOOR (HEAD, BELT PROPS, ETC.). PLEASE TAKE GREAT CARE WHEN PUTTING IT ON, AND STORING IT FOR TRANSPORT. IT SHOULD ALWAYS BE SHIPPED IN IT'S CUSTOM-MADE SHIPPING CRATE. REFURBISHING, REPAIR AND PARTS REPLACEMENT WILL REQUIRE ADDITIONAL COSTS. THIS COSTUME IS WARM AND HEAVY, AND SHOULD ONLY BE WORN IN 30 MIN INCREMENTS. MAKE SURE YOUR PERFORMER STAYS HYDRATED.

### STEP 1

Remove the torso assembly and unsnap the cross support straps which allow you to widen the shoulder suspenders to get into the suit. The legs are pushed up into the body for transport but will get pushed downward a bit out of the suit once the performer steps into the suit and pulls it up.

## STEP 2

Once the performer is in the costume, bring the two shoulder sections together and snap the two cross straps (front and back) into place, and pull down the leg shells and pant legs.

### STEP 3

Then help the performer into the socks inside the boots. The cuff rings fits inside the boot to keep the pant leg in place.

#### STEP 4

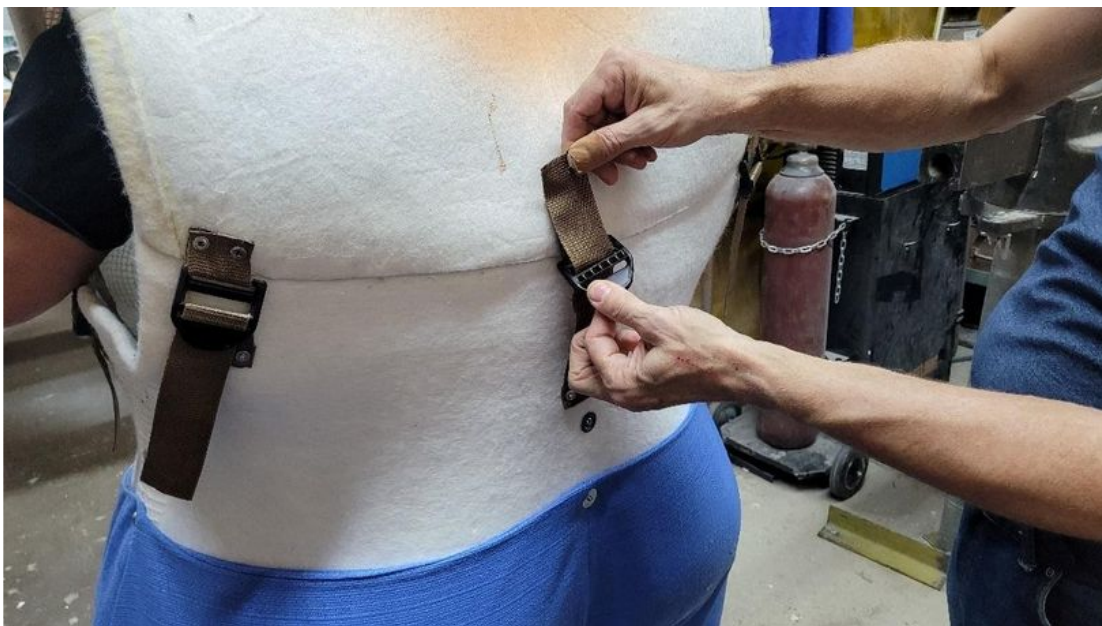

Make sure all the wires for the fan/goggles are up towards the top of the shoulder area so they are easily accessible. Place the upper torso/chest section over the performer's head and lock it into place using the mounted clips/straps, front first.

#### STEP 5

Lift the cloak with all the props on it over the performer's head in one motion. Be careful, as it's a bit heavy, and you don't want the props to fall off the belt. Pull it up and center it so that it sits straight on the upper torso. Pull the rubber collar up through the hole as well as the fan/goggles wires.
