

STEP 6

Button the two side straps to keep the cloak in place, and snap the belt in the back of the costume. Line up the strap on right shoulder with the hole in the cloak. Then put the shawl on (also lining up the strap with the hole). That strap is to hold the bandolier in place later.

STEP 7

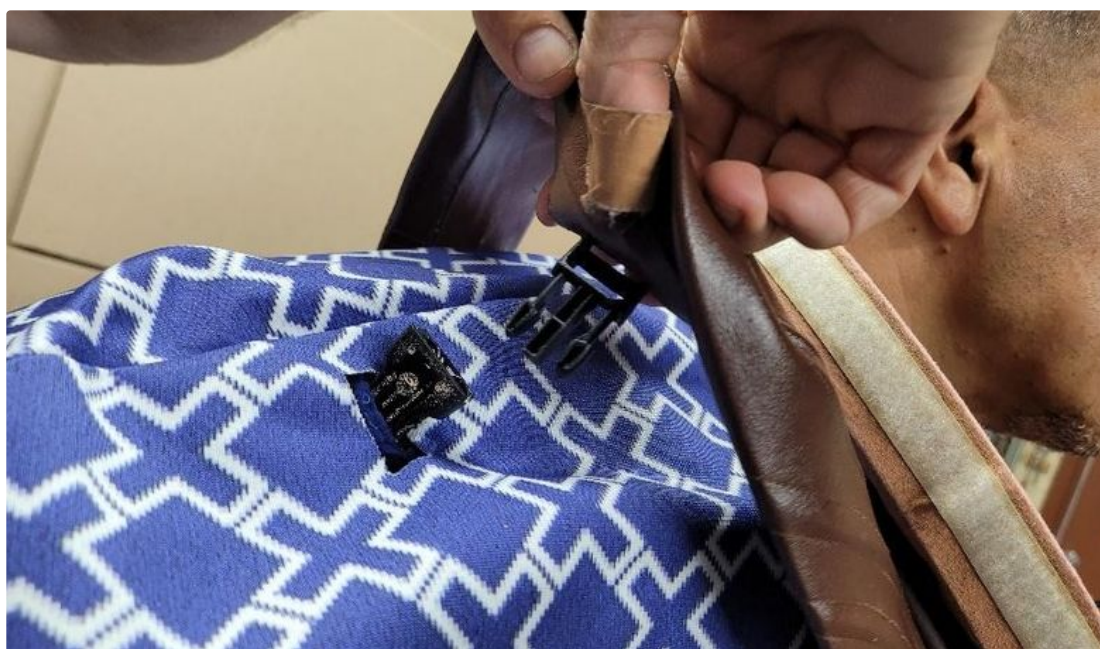

Next, slide the green arms onto the performer's arms and attach them at the top of the shoulder with the clip, and then pull down the cloak and shawl to cover the strap.

STEP 8

Put the bandolier under the performer's left arm, then over their head, attaching it to the strap coming out of the hole

STEP 9

Put Babka's necklace around her neck and slide her hands up into her sleeves.

STEP 10

Pull the wires up out of the collar and put the goggles on the performer. Once the goggles are comfortable, attach the back of Babka's head like a helmet. Secure it with the adjustable chin-strap. Make sure that its comfortable for the performer.

STEP 11

Next, grab Babka's face plate. If you can balance it between your chest and Babka's chest while you connect the wires, great. If not, have another person hold it. Just don't drop it! The wires are all labeled and should be connected as such:

Faceplate wires _____ Goggles/body wire jacks

Headset power----- power jack on goggles

AV IN----- AV IN jack on underside of goggles

Wires A, B and C connect to coinciding labeled jacks
