Babka invites YOU to participate in this repository of wisdom by contributing to it, whether by writing posts, lending your skills, or offering your support. Contact her at hi@babka.com

The world that Babka comes from is an uncomfortable and lonely place, and it's getting worse. Instead of uniting as a global community, humans are splintering into smaller and smaller habitats, as society contracts into an ever narrower band of 0.1%. And those with power are using it to gain even more and more.

Babka knows that the future that she wants is something very different. She wants a future that includes YOU, where humans come together across our differences, sharing our knowledge, skills, and resources, creating an open and borderless encampment that honors our inherent interdependence and thrives through diversity, mutual cooperation, and kindness.

"I have been a gamer my entire life, and if there's one thing I know about gamers, it's that they are a resourceful and resilient bunch. That, and they're passionate about games." ~ Babka

Orbs Development Process

Orbs as meta currency systems that interact with each other has been in the process of being developed internally at Xsolla and through consultancy with Commons Engine.

Orbs Development Process - Commons Engine

📝 Babka Token Life Cycle

Timeline of Orbs Systems development with Commons Engine

(most recent at top)

Internal Orbs Logic Sync

Wednesday, April 5·8:30 – 10:00am

> Invited: Ishan Shapiro, Michael Petralia, Noah Crowe, Pierce Myers, Rachel Joy Victor, Watson Hartsoe

> Otter Links: 🔗 Otter Voice Meeting Notes

Orbs Currency Design Workshop

Tuesday, March 14·10:00am – 3:00pm

> Invited: Ishan Shapiro, Anton Zelenin, Noah Crowe, Pierce Myers, Arsen Yeremin, Eugene Maleev, Arthur Brock, Nikita Zaytsev, Rachel Joy Victor, Rytis Joseph Jan, Shurick Agapitov, Sasha Saifuranov, Ferananda Ibarra, Gabriel Shalom, Watson Hartsoe

> Otter Links: 🔗 Otter Voice Meeting Notes 1:30pm

> 🔗 Orbs Currency Design Workshop 1:41pm (noah's otter)

> 🔗 Otter Voice Meeting Notes 10am

> Topics Covered

- Overview and setting context for Orb design
- Orbs & Item Vision, conversation
- Currency Life Cycles & Conversation
- Gold Orbs Life Cycle
- Blue Orbs Life Cycle
- Digital Items Distribution

Commons Engine: Currency Day @ Babka Team Offsite

Friday, February 10th

Invited: Ishan Shapiro, Noah Crowe, Arthur Brock, Ferananda Ibarra, Rachel Victor, Pierce Myers, Michael Petralia, Connor Turland, Pegah Vaezi, Watson Hartsoe, Jocelyn Ibarra, Shurick Agapitov

🔗 Babka's Offsite Metacurrency Conversation 9am

Topics Covered

- Review and clarify the Token Life Cycle for Gold Orbs already in Miro
- Learn the distinction in between Token Life Cycle and Currency Life Cycle, as it will prove essential for the rest of the designs
- System Life Cycle of Gold Orbs and get familiar with the tools for documentation (we will present some of this)
- Currency Life Cycle for the Blue Orbs (we will do this together from scratch)
- Connect to the narrative work and begin envisioning the loyalty orb. This might require that we get into another framework we call "Dimensions of incentives".
- Talk about the documentation / whitepaper and our collaboration

Babka Loyalty / Commons Engine Kickoff

Wednesday, January 4·2:30 – 3:30pm

Invited: Ishan Shapiro, Ferananda Ibarra, Noah Crowe, Pierce Myers, Rachel Joy Victor

Babka Integrations Manual

So, you're looking to integrate Babka! This is the place to start.

There are two main types of integrations:

Babka Account

At a top level, you can integrate with the Babka Account, which enables you to integrate with the suite of Babka feature and the Babka Product Ecosystem.

Babka Overlay

Babka Overlay is a modular UI overlay for Metasites and Cloud Gaming.

Architecture

📄 Babka Overlay FE architecture

📄 Documentation

📄 Integration of Babka Overlay UI to the Metasite

📄 How-to: run Babka Overlay UI locally and on stage

📄 How to integrate Metasite BE

📄 For testing we are using

🚀 Deployment of the Babka Overlay UI

Babka Overlay SDK

📕 npm: @xsolla/babka-overlay-sdk

Babka Wallet

We currently use Magic Wallet Services to provide a self-custodial crypto wallet to users with a Babka account. This wallet is created upon sign in for existing Babka users, and sign up for new Babka users.

👛 Babka Web3 Wallet

📄 Magic Link SDK

Building on the Babka Wallet:

😲 Integration point to external web3 providers

Tatum SDK:

📄 Tatum

Babka Orbs

📄 Orbs as a IGS virtual currency

📄 Orbs as Virtual Currency

📄 Autotesting in Orbs API

Babka Pay

To integrate Babka Pay, a Publisher account is necessary.

Then, integrate Paystation according to the Xsolla Documentation: 🔗 Xsolla Documentation - Pay Station

Then, provide your Publisher ID to Sergei Shapovnikov who will create the appropriate integration ticket to turn on Babka Pay for that publisher ID manually.

In the future, Babka Pay will be an option that publishers can select and turn on/off within their Publisher account. Until then, it is a manual process that needs to be executed by Babka Pay team.

Once Babka Pay team configures the publisher ID, then Babka Pay will be active.
